Dear Mr. Murphy:

November 17, 1986

As we discussed in early October, Interstate Brick is developing plans to rehabilitate the "Clay Pit" excavation above the Canyon Cove Subdivision. The pit reclamation is being supervised by the Utah State Division of Oil, Gas & Mining. It is unclear what stabilization measures, if any, DOGM will require as part of the rehabilitation.

The Planning Staff remains concerned about the hazard imposed by potential slope failure above the Canyon Cove subdivision. Building permits will continue to be withheld on Lots 209, 210, 211, 301 and 302 until an acceptable plan for slope stabilization has been implemented to mitigate this hazard.

I urge you to contact Mr. Lance Jackson of Interstate Brick, telephone 561-1471, to discuss a possible joint effort between your firm and Interstate Brick for pit rehabilitation and slope stabilization. We remain willing to review plans, offer suggestions, or host meetings. Please contact us with any questions or comments.

Sincerely yours,

Clavne J. Ricks,

Pirectar

Craid V. Nelson
